

Department of Defense

246.670

or copies of the shipping paper(s), or on an attachment—

The supplies in this shipment—

1. Have been subjected to and have passed all examinations and tests required by the contract;
2. Were shipped in accordance with authorized shipping instructions;
3. Conform to the quality, identity, and condition called for by the contract; and
4. Are of the quantity shown on this document.

This shipment was—

1. Released in accordance with section 246.471 of the Defense FAR Supplement; and
2. Authorized by (name and title of the authorized representative of the contract administration office) in a letter dated (date of authorizing letter). (Signature and title of contractor's designated official.)

(ii) Release and process, in accordance with established instructions, the DD Form 250, Material Inspection and Receiving Report, or other authorized receiving report.

246.472 Inspection stamping.

(a) There are two DoD quality inspection approval marking designs (stamps). Both stamps are used—

(1) Only by, or under the direct supervision of, the Government representative; and

(2) For both prime and subcontracts.

(b) The designs of the two stamps and the differences in their uses are—

(1) *Partial (Circle) Inspection Approval Stamp.* (i) This circular stamp is used to identify material inspected for conformance to only a portion of the contract quality requirements.

(ii) Further inspection is to be performed at another time and/or place.

(iii) Material not inspected is so listed on the associated DD Form 250 (Material Inspection and Receiving Report), packing list, or comparable document.

(2) *Complete (Square) Inspection Approval Stamp.* (i) This square stamp is used to identify material completely inspected for all contract quality requirements at source.

(ii) The material satisfies all contract quality requirements and is in complete conformance with all contract quality requirements applicable at the time and place of inspection.

(iii) Complete inspection approval establishes that material which once was

partially approved has subsequently been completely approved.

(iv) One imprint of the square stamp voids multiple imprints of the circle stamp.

(c) The marking of each item is neither required nor prohibited. Ordinarily, the stamping of shipping containers, packing lists, or routing tickets serves to adequately indicate the status of the material and to control or facilitate its movement.

(d) Stamping material does not mean that it has been accepted by the Government. Evidence of acceptance is ordinarily a signed acceptance certificate on the DD Form 250, Material Inspection and Receiving Report.

(e) Policies and procedures regarding the use of National Aeronautics and Space Administration (NASA) quality status stamps are contained in NASA publications. When requested by NASA centers, the DoD inspector shall use NASA quality status stamps in accordance with current NASA requirements.

Subpart 246.5—Acceptance

246.504 Certificate of conformance.

Before authorizing a certificate of conformance for aviation critical safety items, obtain the concurrence of the head of the design control activity (see 209.270).

[69 FR 55989, Sept. 17, 2004]

Subpart 246.6—Material Inspection and Receiving Reports

246.670 General.

(a) Material Inspection and Receiving Reports (MIRRs) are used to document—

(1) Contract quality assurance;

(2) Acceptance of supplies and services; and

(3) Shipments.

(b) MIRRs are used by activities responsible for—

(1) Receiving;

(2) Status control;

(3) Technical requirements;

(4) Contracting;

(5) Inventory control;

(6) Requisitioning; and

(7) Payment.
